

David Dunlap

David Dunlap currently wears the various hats of Senior Project Manager, Estimator and Assistant Designer for a multiple award winning custom design/build firm in Santa Fe NM. He is also a trained HERs rater and green verifier. David is passionate about green building and renewable energy and has been a strong advocate for PV, solar thermal, water conservation and using green building practices in all the homes he builds. He consulted on the original Residential Green Code and Remodel & Addition Green Code for the City of Santa Fe.

During the recent recession, David worked for the West Region Energy team at Honeywell Building Solutions, selling energy and water efficiency upgrade projects in the public sector. Using Energy Services Performance Contracting (ESPC) as the primary procurement vehicle, his efforts were focused on cities and higher education facilities in Colorado, New Mexico, Wyoming, and Washington. Networking, advocacy, education, outreach and technology expertise were all important skills he brought to this position.

David's education includes a BA in Anthropology from Pomona College, studies in Architectural design at the University of Edinburgh Scotland, PV design with Solar Energy International, and many building science and green building classes over 15 years in the construction industry. Prior to his construction career, he worked in the field as an experiential outdoor educator with teenagers in southern California and New Hampshire, before becoming a retail store manager in Santa Fe selling high performance outdoor equipment and clothing for backpacking, kayaking, rock climbing, skiing and camping.

He lives in Santa Fe, NM with his family on 5 acres, capturing their rainwater for use in the vegetable garden, keeping bees, and working in the ceramics & jewelry studio.
