

George Van Hoesen

I am a design expert in Low Impact Development (LID). I have designed a community that is planned to be a net zero energy community. Specialties include: Community Planning, Resilient Construction, Green Building and Design, Negotiation with City, County and State agencies.

Director of Research and Development

Non Toxic Organic Product Company

Developing environmental chemicals. I work with organic and non-toxic chemistry, for agricultural and health uses. Plant health and growth is a main part of the work that I do in the lab setting. I develop many new and safer products for plant and animal use.

Partner

Global Green Building LLC

A Green Building Company specializing in low impact development, energy efficiency, resilient construction, off grid homes, and practical green building.

- **Storm Resistant Homes**
Building homes to withstand winds over 200 MPH.
- **Zero Energy Community Design**
Designing communities to use the natural resources that are available to them.
- **Storm Shelters for Schools**
We are designing and building affordable storm shelters for schools in Kansas.
- **Off Grid Homes**
Built and designed an off grid home for two clients that have a farm in the country and were losing power all the time.
