

Robert Kreger

Architect W. Robert (Bob) Kreger, AIA, specializes in high performance residential design build. He produced the first custom LEED Platinum home in the state of New Mexico in 2008. Headquartered in Santa Fe, Kreger Design Build was established in 2002 and recently certified with the Passive House Institute US as both a CPHC (Certified Passive Home Consultant) and a CPHB (Certified Passive House Builder). Bob Kreger is also a licensed New Mexico home builder, and has been recognized several times by the Haciendas Parade of Homes for green building. A Habitat for Humanity Hero, he was voted by his peers for launching the ongoing energy performance transformation in homes built by Santa Fe Habitat for Humanity. Kreger is also developing architecturally enhanced and insulated rainwater storage, called RainVessels, informed by the newly released WERS Standard (Water Efficiency Rating Score).
